Dear Parents/Carers,

Essential electrical works

I am writing to inform you that some essential electrical work has commenced today outside of school.

As you are aware, there was an electrical fault last week in school caused by a problem in the street and we now have a generator outside keeping the school up and running. Until the fault is identified, it is unknown how much disruption there will be but unfortunately, part of the pathway outside school has to be dug up and there are traffic lights in place.

With this in mind, all reception children will come into school and be dismissed through the hall doors until further notice.

Parking outside of school will be severely disrupted. Please be extra vigilant as you approach school and take extra care.

Thank you for your patience with this matter. I am hopeful that we will be back up and running before too long,

Yours sincerely,

Headteacher
